VICTOR COLLASANTA

Web3 / Javascript Engineer

📞 +5511999121533 @ victor.collasanta@gmail.com 🔗 https://linkedin.com/in/collasanta 🔗 https://github.com/collasanta

📍 Remote GMT-7 to GMT-3 ☆ 27 Years, Brazilian

CAREER

5 years of experience working with JavaScript and Web3 technologies building complex applications from traditional finance at Citibank to Web3 projects, including FX/crypto trading systems at YC-backed OWNY.COM, a real estate tokenization platform in Brazil, and worked with DeFi protocols (such as UniswapV3), deploying mainnet smartcontracts across multiple EVM chains.

Won recognition at First Ethereum SP Hackathon with sponsorship prizes from Polygon, ChainLink, and Cryptum.

Founded Chadchapters.com, an AI Video Summarizer SaaS that processed hundreds of YouTube videos and generated thousands of engagement interactions. And built custom chatbots (RAG) for clients.

EXPERIENCE

Senior Web3/Full-Stack Engineer

OWNY.COM (YCombinator)

📅 05/2024 - Present 📍 Remote Work, Slicion Valley, USA

- Architected and deployed FX and Crypto trading between 60+ currencies (Coinbase / Banking APIs)
- Developed an AI chatbot interface to automate app actions with natural language
- Maintained, developed, and updated multiple repos running under microservices on AWS

Mid Web3/Full-Stack Engineer

CRYPTUM.IO

📅 10/2022 - 11/2023 📍 Remote Work, Brazil

- Built Frontends and backends linking Web2 and Web3 that served 10.000's requests for a Real Estate Tokenization Project.
- Developed a Uniswap V3 Javascript SDK, enabling JS developers to interact with Pools and transactions programmatically.
- Continuous Integration/Deployment Pipeline, Git, pull requests, code reviews, and unit/integration testing

Jr Web3/Full-Stack Engineer

MENTORA.GG

📅 03/2022 - 10/2022 📍 Remote Work, Brazil

- Created, designed, tested, and deployed smartcontracts that handled 1.000s of user interactions on Polygon and other EVMs
- Early employee at startup, took part in the full project lifecycle, from design, to launch, to roadmap execution

Backend Engineer Internship

CITIBANK

📅 03/2018 - 01/2019 📍 On-Site, São Paulo, Brazil

- Developed internal applications within the Market Risk division, utilizing VBA, and database manipulation with SQL
